

EDGELESS SweetSpot

Product Release

Advanced Sound Solutions

Whether you're an active custom installer or an avid listener, Earthquake's EDGELESS SweetSpot angled in-ceiling speakers will fit your need.

Earthquake's ECS-SS82 offers precision angling to meet you right in your sweet spot, or your favorite listening position. In addition to being able to control the direction of the woofer's sound, you can also adjust the angle of the high quality resin coated silk dome tweeter for uncompromised sound quality and staging. And if that isn't enough detail for you, Earthquake engineers also included an in depth tonal control center for the many different listening preferences among end users.

Built using quality crossovers with precision filters and capacitors, plus gold plated and spring-loaded binding posts for quick connections and solid current flow, the ECS-SS82 is also equipped with R435 echo control dampening material used to eliminate damaging reflections and refractions caused by sound waves that bounce off hard surfaces.

The ECS-SS82 can be completely tailored to a consumer's preference and also be painted to match any décor. With their paintable grilles, low profile and edgeless design, the new ECS-SS82 is only visible to the ear.

Advanced Features:

- Frameless design for reduced visibility/seamless blend
- Up to 20 degrees angled SweetSpot
- Echo control R435 sound absorbing material
- Easy adjust Bass/Treble trim
- Easy install Turn-N-Lock™ installation mechanisms
- Easy install magnetically attached and paintable speaker grilles
- Elaborate crossover networks with gold plated & spring loaded speaker terminals
- Silk dome 1" swiveling neodymium tweeter
- High quality and precision polypropylene woofer with wide rubber surround for extended bass response and more piston area.

Specifications:

Frequency Response:	30Hz - 30kHz
Sensitivity:	91dB @ 1W/1M
Nominal Impedance:	8-Ohm
Power Handling:	30 - 300 Watts
Enclosure Material / Type:	Impact resist ABS Plastic
Driver Components:	one 8" wide surround woofer with polypropylene cone and one 1" (25mm) silk dome swiveling compression tweeter
Wire Gauge Recommended:	12
Weight (grille included):	7.64 lbs (3.46 kgs)
Grille Finish:	White / Paintable

MSRP

ECS-SS82 | \$350.00/piece
