

# Line Array In-Wall Speakers **EWS-LA63**

The new EWS-LA63 (line array in-wall system) benefits from 57 years of acoustic discoveries dating back to 1957. Line array system is a directive way of sending sound wave from the speaker to the listener with minimum wall reflection. You listen to the music, not the room. In a typical room, the EWS-LA63 requires 4 times less power than a single pressure level at a listening position. As the power is reduced, so are the reflections.

## **EWS-LA63 FEATURES:**

- Six 3" low mass poly cone midbass
- 1" (25mm) silk dome NEO swiveling tweeters
- Easy Turn-N-Lock™ installation mechanism
- Edgeless design for reduced visibility
- Gold plated, spring loaded terminals
- Elaborate crossover networks
- Magnetically attached, paintable grilles
- Extruded aluminum body
