

MKIV Series

Product Release

MKIV10/12

High Power & Efficiency

Supernova MKIV Series is designed for accurate reproduction of bass and sub-bass frequencies.

With its patented SLAPS technology, one amplifier produces the output of two woofers, this being more economically efficient. Yes! The SLAPS will reduce your power consumption and it also has a powerful 450-Watt class “A/B” amplifier with a multitude of user friendly features like the auto detection switch, 0 - 180° phase switch, 12dB/octave variable filter and more!

Save Money, Gain Power
Great For: Town Homes, Condos,
Apartments & Restaurants

Features:

- 450-Watt Class “A/B” power amplifier
- Dual firing powered subwoofer with SLAPS passive
- 12dB/Octave variable filter from 40 - 180Hz
- Auto Signal detection for on or off
- SLAPS technology increases dB level and saves energy
- Low level (RCA) inputs and High level input
- 0 - 180° phase shift
- Rounded edge cabinet
