

GRANITE-10

The new Granite-10 Outdoor Subwoofer is the newest addition to Earthquake's ROCK-ON speaker series. It was specifically designed to imitate a rock-like appearance that can easily blend in with any outdoor environment. The enclosure of the Granite-10 is made from an extremely durable epoxy resin construction and other UV treated materials making this subwoofer an ideal choice for the most demanding outdoor elements. The ROCK-ON Granite-10 Subwoofer features a high power crossover that reduces distortions and produces pure sound that blends in with nature. The ROCK-ON Granite-10

brings true bass to your outdoor space which is something that is greatly needed in today's rock speaker market. The Granite-10 is ported with an "S" shape that also helps in preventing water & moisture from getting trapped inside the structure. The Earthquake ROCK-ON Granite-10 Outdoor Subwoofer is a great choice for adding bass to any new or pre-existing outdoor audio system. The enclosure can also be painted so that it may match or compliment your garden, pool area, front yard, back yard, etc. With the Earthquake Granite-10 you will turn any outdoor space into an entertainment center.

BIG OUTDOOR BASS

EXPAND YOUR AUDIO SYSTEM

Earthquake Sound's ROCK-ON series of speakers further enhance your home audio system by bringing music and movies to the outdoors. They will revitalize your outdoor living space as you spend more time outside throughout the warmer months.

TOUGH & RUGGED

The enclosure of the Granite-10 is constructed with an extremely durable epoxy resin and further enhanced with UV treated materials. This makes the subwoofer withstand the most demanding outdoor elements and is built to last.

"S" SHAPED PORT

The port of the Granite-10 was specifically designed to be "S" shaped so that water cannot get trapped inside. Multiple tests were done to make sure that this subwoofer could stand up against the most abusive weather conditions.

MOISTURE PREVENTION

The Granite-10 subwoofer is a completely sealed unit making it an ideal choice for patios, gardens, poolside areas, and outdoor living spaces.

PAINTABLE ENCLOSURE

This subwoofer comes out of the box with a stock granite finish enclosure. This outer finish can also be custom painted to your liking so that it can further blend into its surroundings.

ULTIMATE OUTDOOR 2.1 SYSTEM

The Granite-10 subwoofer was designed to be paired up with Earthquake's Granite-52 outdoor speakers to create an outdoor 2.1 system with clean and accurate sound.
